

The Shocking Truth: most property systems are not designed for Occupiers

o6ix is different. The first ever solution designed specifically for the corporate occupier, o6ix effortlessly integrates property, lease and facilities management in one easy-to-use package.

With o6ix you can optimise, analyse and minimise your occupancy costs; measure and improve property performance; and customise the system easily to fit existing business structures.

o6ix can be linked to your corporate accounting system or provided with its own integrated accounting.

o6ix benefits

- analyses and minimises occupancy costs.
- provides full property and lease management.
- provides measurements against Key Performance Indicators to allow you to analyse your performance.
- analyses rental liabilities.
- permits very powerful slice-and-dice comparison and analysis via a browser-based Executive Information Tool.
- accommodates frequent changes to property and/or divisional structures.
- copes with any unusual data requirements via tailorable screens.
- ensures that key dates cannot be missed with a powerful diary linked to Outlook.
- provides full facilities management, project tracking and maintenance via an optional module.
